

DARIUS NAVICKAS

JUNIOR FRONT-END DEVELOPER

ABOUT ME

I am highly interested in programming because of its challenges and learning possibilities. As I am willing to change my career I successfully completed Front-End Engineering course at BIT. This led me to be actively learning different technologies and tools in my course and on my own to become a better programmer, as I'm passionate about IT and eager to dive deeper. I have 10 years of experience in sales management, what help me to master my problem solving, decision making and time planing skills, which I believe is very important in IT industry.
